

ADVANCED BEHAVIOR MANAGEMENT, CERTIFICATE (1736)

Program Coordinator

Christina R. Noel, christina.noel@wku.edu, (270) 745-4255

This certificate program offers five courses that specialize in behavior management techniques for school-aged children. Through the progression of the courses, candidates will learn how to define and assess problem behaviors, and develop evidence-based interventions to decrease problem behaviors and increase pro-social behaviors and improve academic outcomes. This certificate is appropriate for anyone working in a P-12 setting and may include classroom teachers, school counselors, speech pathologists, occupational therapists, paraprofessionals, and other school related personnel. It may also be beneficial to parents, camp counselors, and after-school personnel. The courses are written with content appropriate for varied supervision roles that school personnel working with P-12 students may encounter. There are a number of courses that have similar content in the Psychology Master's program; however, the proposed certificate is created for professionals who are not interested in pursuing a graduate degree in psychology, but are interested in learning about targeted behavior management techniques. This certificate is targeted for these diverse roles.

Program Admission

Please refer to the admission section (<http://catalog.wku.edu/graduate/admission>) of this catalog for Graduate School admission requirements.

Program Requirements (15 hours)
