The program uses knowledge and skills from the fields of psychology and education to provide specialized preparation to engage in a variety of roles related to special education services, data collection and analysis, consultation, crisis preparedness and response, mental health services, and academic and behavioral interventions. The program emphasizes the application of knowledge through supervised experiences in the psychology department's clinic and through practicum and internship placements in the public schools. After the required coursework, a 1200-hour (minimum) internship must be completed.
