

PSYCHOLOGICAL SCIENCE, BACHELOR OF SCIENCE (747E, 747)

Program Coordinator

Andrew S. Mienaltowski, andrew.mienaltowski@wku.edu, (270) 745-3918

The Department of Psychological Sciences offers programs designed for students who are interested in a science-oriented degree that will prepare them for graduate study in psychology, neuroscience, or a related field (e.g., medical school, pharmacy, physical therapy) or for employment in jobs where strong quantitative and research skills are required.

Concentrations

- Applied Psychological Science (PAPS)
- Biobehavioral Psychology (PBBP)
- Clinical Psychological Science (PCPS)
- Cognitive Psychology (PCGP)
- Developmental Science (PDVS)
- Neuroscience (PNEU) (Available to 747E Majors only)
- Social Psychology (PSOP)
- Quantitative Psychology (PSQP) (Available to 747E Majors only)
- General (PGEN)

Program Requirements (37-58 hours)

The department provides two options for the Bachelor of Science degree. The non-extended option requires a minimum of 37 credit hours and a minor or second major is required. The extended option requires a minimum of 49 unduplicated credit hours and no minor or second major is required. For both options, students will complete a program of study that includes Core and Concentration components as well as a Laboratory Experience component. To complete the Core requirement, students will select a total of 25 to 28 credit hours from the following categories: Foundations of Psychology, Developmental Processes, Learning and Cognition, Individual Differences and Social Processes, Biological Bases of Behavior and Mental Processes, Research Methods and Statistics, and Integrative Science in Psychology. To complete the Concentration requirement, students will select courses from one or two of the six thematic concentrations or they may design a general concentration (subject to approval by their advisor). To complete the Laboratory Experience component, students will complete one PSYS lab course or one PSYS lecture / lab course at the 300-level or above. Students in the non-extended option will complete 12 credit hours from one thematic concentration, or design a custom concentration by selecting 12-24 hours from PSYS courses not used to satisfy their Core requirement. Students choosing the extended option will complete 24 credit hours from two concentrations or 24 – 25 hours from the quantitative psychology concentration.

The interdisciplinary neuroscience concentration is a single concentration option for students. Students in this concentration complete 56-58 hours of courses with an emphasis on neuroscience. Students who select this concentration cannot minor in Neuroscience.

Students must maintain a minimum 2.50 GPA both overall and in the major. Either

1. MATH 116 and MATH 117, or
2. MATH 118 or higher is required; MATH 183 is recommended.

Students who select the extended option with the quantitative psychology concentration must complete MATH 136. To satisfy the math requirement for the major, students in the neuroscience concentration may also complete MATH 136.

Students in the non-extended option of the Psychological Science major can count no more than 3 credits of PSYS 490 toward the major. Students in the extended option, including the quantitative concentration, may count no more than 6 credits of PSYS 490 towards the major, with no more than 3 credits counting toward a single concentration's requirements. Students in the neuroscience concentration of the Psychological Science major may count no more than 3 credits of PSYS 490 towards the major. PSYS 300 is recommended to meet the Colonnade: Writing in the Disciplines requirement but does not satisfy major requirements.

The Psychological Science major includes laboratory experiences. In addition to completing a laboratory in research methods, students in the non-extended option of the major and in the extended option of the major (including the quantitative concentration) complete one additional laboratory experience. Students in the neuroscience concentration complete two additional psychological science laboratory experiences in addition to the research methods laboratory.

A baccalaureate degree requires a minimum of 120 unduplicated semester hours. More information can be found at www.wku.edu/registrar/degree_certification.php. (https://www.wku.edu/registrar/degree_certification.php)

Students who began WKU in the Fall 2014 and thereafter should review the Colonnade requirements located at: <https://www.wku.edu/colonnade/colonnaderequirements.php>. (<https://www.wku.edu/colonnade/colonnaderequirements.php>)

Neuroscience Concentration

This interdisciplinary concentration emphasizes neuroscience and includes courses investigating the brain from the level of cellular biology to higher order psychological systems. This concentration requires more than 48 hours, so students do not need a minor or second major. Also, students in this concentration do not select another concentration within the Psychological Science Major. Note that students who intend on completing BIOL 319 as an additional restricted elective in this concentration will first need to earn a C or higher in CHEM 120 and CHEM 121. CHEM 120 and CHEM 121 are not part of the Neuroscience concentration in the Psychological Science Major.

Quantitative Psychology Concentration

This concentration focuses on the use of advanced data manipulation and statistical analysis techniques within psychological science to examine discipline-specific research questions. This concentration requires at least 49 hours, so students do not need a minor or second major. Also, students in this concentration do not select another concentration within the Psychological Science Major.
